Summary

Computer Science graduate with hands on experience in programming. Adept at solving technical problems, learning new technologies, and working both independently and in teams. Comfortable with languages such as Python and Javascript, cloud tools like AWS, and version control using Git. Eager to apply and expand my skills in a dynamic, growth-oriented environment.

Education

Mindanao State University Iligan Institute of Technology
Bachelor of Science in Computer Science - GPA: 1.755

Aug 2020 – Feb 2025

Skills

Languages: Python, Javascript, HTML/CSS, SQL

Frameworks: Flask, React

Tools: Git, Docker, Postman

Databases: MySQL, PostgreSQL

Platforms: AWS, Cloudflare

Experience

Full Stack Web Developer (Internship)

July 2024 – Sept 2024

Pixel Digital

- Interned at Pixel Digital as a **full-stack developer**, building e-commerce applications including inventory and restaurant management systems.
- Developed backend and frontend features using **Laravel**, **PHP**, **Blade templates**, and **JavaScript**, collaborating closely with designers and developers.
- Gained hands-on experience with **Git**, agile development, and relational databases like **MySQL**.
- Participated in debugging, testing, and refining features to improve performance and user experience in a fast-paced production environment.

Undergraduate Thesis

Aug 2023 – July 2024

MSU-IIT

- Developed a gamification system for an LMS as part of my thesis project: *"Loyalty: Will the Integration of Gamification Promote Learning Interactions in my.Eskwela"*.
- Focused on backend API development using **Python (Flask)**, integrated with a **React** frontend and **PostgreSQL** database.
- Designed and implemented RESTful APIs and used **Zrok** tunneling service for real-time testing and demo access.
- Created custom game assets and animations with **Canva**, supporting a points-based reward system that increased student task completion by **60%**.

Projects

Personal Portfolio

jaysun.site 

- Built and deployed a responsive personal portfolio using HTML, Tailwind CSS, and JavaScript.
- Hosted on AWS EC2 inside a VPC, with SSL and domain management via Cloudflare.
- Emphasized modular design, performance optimization, and secure production deployment.

Network-Attached Storage (NAS) with Nextcloud

[GitHub](#) 

- Deployed a private NAS using Nextcloud on a Ubuntu server for secure file storage and sharing.
- Configured Cloudflared tunnel for encrypted remote access.

- Implemented user roles, scheduled backups, and self-hosted file management features.

Student Information System

GitHub 

- Built a basic student management platform using Flask, PostgreSQL, and HTML/CSS.
- Allows user registration of students, assignment to colleges, and course enrollment.
- Designed backend logic and database schema with real-time testing via Zrok tunnel.
