Summary

Recent Computer Science graduate with a strong foundation in programming, networking, and system administration. Adept at solving technical problems, learning new technologies, and working both independently and in teams. Experienced with languages such as Python and C/C++, cloud tools like AWS, and version control using Git. Eager to apply and expand my skills in a dynamic, growth-oriented environment.

Education

Mindanao State University Iligan Institute of Technology

Aug 2020 – Feb 2025

BS in Computer Science

- GPA: 1.755
- **Thesis:** Loyalty: Will the integration of gamification in my.eskwela improve student learning interactions?

Skills

Languages: Python, Javascript, HTML, CSS, PHP, SQL, C/C++

Frameworks: Flask, Laravel, Tailwind CSS, React

Tools: Git, Docker, Postman

Databases: MySQL, MongoDB

Platforms: AWS, Cloudflare

Experience

Full Stack Web Developer (Internship)

July 2024 – Sept 2024

Pixzel Digital

- Interned at Pixzel Digital as a **full-stack developer**, building e-commerce applications including inventory and restaurant management systems.
- Developed backend and frontend features using **Laravel**, **PHP**, **Blade templates**, and **JavaScript**, collaborating closely with designers and developers.
- Gained hands-on experience with **Git**, agile development, and relational databases like **MySQL**.
- Participated in debugging, testing, and refining features to improve performance and user experience in a fast-paced production environment.

Undergraduate Thesis

Aug 2023 – July 2024

MSU-IIT

- Developed a gamification system for an LMS as part of my thesis project: *"Loyalty: Will the Integration of Gamification Promote Learning Interactions in my.Eskwela"*.
- Focused on backend API development using **Python (Flask)**, integrated with a **React** frontend and **PostgreSQL** database.
- Designed and implemented RESTful APIs and used **Zrok** tunneling service for real-time testing and demo access.
- Created custom game assets and animations with **Canva**, supporting a points-based reward system that increased student task completion by **60%**.

Projects

Personal Portfolio

[Link](#) 

- Developed a responsive portfolio using HTML, Tailwind CSS, and JavaScript to showcase personal projects and skills. Deployed the site on an AWS EC2 instance within a VPC, with domain and SSL configured via Cloudflare, emphasizing performance, modular design, and secure hosting.
- Tools Used: HTML, CSS, Javascript

Network Access Storage (NAS) setup using nextcloud

[Documentation](#) 

- A complete Network Attached Storage solution built with Nextcloud, providing secure file storage, sharing, and collaboration features. Includes automated backups, user management, and mobile app synchronization.
- Tools Used: ubuntu server, Cloudflared Tunnel

Student Information System

[Documentation](#) 

- Comprehensive student management platform with enrollment tracking, grade management, attendance monitoring, and parent portal integration. Built with modern web technologies and secure authentication.
- Tools Used: Python, Flask, HTML, CSS Javascript
